

BODY SHOP SAFETY

TRAINING FOR DEALERSHIP EMPLOYEES

The service department and the body shop have a lot in common when it comes to physical and chemical hazards, but due to the nature of their work, collision repair professionals can be exposed to a wider variety of potentially unhealthy and dangerous workplace conditions than those working in a standard service department. While engineering controls can mitigate some health hazards, numerous health and safety measures should be in place to safeguard workers.

Join us for a discussion on how to create a safer work environment by recognizing and controlling the hazards found in the body shop.

DISCUSSION TOPICS

- Body Shop Health Hazards
- Respirators
- Welding & Burning Operations
- Sprinkler & Fire Systems
- Flammable & Combustible Liquids
- Ohio Fire Codes
- Air Permits
- Reducing VOC
- Hazardous Waste Manifests

WHO SHOULD ATTEND

Owners	Fixed Operations Directors
General Managers	SAFE Supervisors
Body Shop Managers	Body Shop Personnel

Date:
Wednesday, November 12, 2025

Time:
1:00pm-3:00pm

Location:
9150 S. Hills Blvd.
Broadview Heights, OH 44147
(Lower level conference room)

Registration:
Online www.gcada.org
Call 440-746-1500
jkincannon@gcada.org

SAFE Members - Free
GCADA Members - \$50/pp
Non-Members - \$100/pp
